Barbara Zibell

*Summer Term 2013 Compulsory Course: Gender Studies in Spatial
Sciences / Raumwissenschaftliche Gender Studien*

En-gendered places (II): field study in Kronsberg.

*Suitable for
B.Sc. Arch. and B.Sc. La&Env from 5. Sem.
M.Sc. ArcUrb, M.Sc. La, M.Sc. Env
Also open for other faculties*

Seminar consisting of:

*Field Study Seminar, 3 ECTS: 18 April-4 July Thurs 14.00-17.00, plus final
colloquium*

Contents and learning objectives

*The perspective of sustainability applied to territorial and urban regeneration processes
cannot avoid by now taking into consideration social aspects.*

*Among social sciences, gender studies are arousing more and more interest as
integrative analytic tool aimed at renewing the way private and public spaces are
shaped.*

*With these premises, the seminary will be centred on the relationship between gender
and both urban and architectural space introducing the students to a new perspective
on their planning choices.*

*Some basic concepts of gender-sensitive analysis and planning will be sketched up,
and after the collective survey of the Kronsberg area and meetings with experts and
planners, students will work in groups. Each one of them will concentrate on the study
of a specific part of the chosen environment under the gender perspective. Analysis
will be completed by the student's conclusions and proposals.*

*The aim of the seminar is to develop a gender-sensitive consciousness in future
planners and architects, providing references and tools to put it in practice.*

*Teaching method Lectures, area survey, interviews, group working, discussions and
debates*

Language English

Course achievement Active and regular participation and final presentation

Course Assessment Final report + colloquium
